Hands-on Training Program on

Innovation Hub of RSC Dehradun organizing Hands-on training programs on Robotics

Innovation hub is a multi-disciplinary laboratory equipped with moderate set of tools and scientific instruments. The facility is set up at RSC Dehradun to promote creativity and innovations by the young minds. This facility not only ensures more effective utilization of the science centre, but also redefines its usages and role in fostering problem solving and project based learning & engagement. This facility provides hands-on/ practical learning and engagement in the process of science, technology and innovation to the students.

In this summer, Innovation is all set to organize seven training programs on robotics for the students of Class 6-12. Proposed program will provide a hands-on training to students on robotics, which will certainly enhance creativity and problem solving skills of students through educational training. A certificate of participation will be awarded to the trainee students.

Training Schedule & Charges:

RSC planned to organize seven trainings of 5 day each:

1. 09 to 13 th May, 2017	5. 13 to 17 th June, 2017
