Sub.: *Training Programme on 'Housing for All - Innovative Technology for Affordable Housing' July 20-24, 2015.*

Dear Sir,

As you are aware, CSIR-CBRI has been vested with the responsibility of generating, cultivating and promoting building science and technology in the service of the country since more than six decades. The Institute has been assisting the building construction and building material industries in finding timely, appropriate and economical solutions to the problems of materials, rural and urban housing, energy conservation, efficiency, fire hazards, structural and foundation problems and disaster mitigation.

During the recent past we have developed innovative technologies on building design and construction with respect to disaster risk mitigation and construction of safe built environment. Recently, Govt. of India has launched programme on construction of affordable safe housing for all in the country and accordingly CSIR-CBRI is launching a series of training programmes on innovative technologies developed by the institute for the administrative machinery of the district/states in the country for its implementation at grass root level. The first training programme on 'Housing for All - Innovative Technologies for Affordable Housing' is being conducted during July 20-24, 2015 at this institute. The programme will be conducted through participative methods including experience sharing and discussions etc.

We shall appreciate if you could kindly nominate 4-5 officers from your department for the training. The details of training programme are given in the enclosed brochure. The nominations may please be sent to us latest by July 03, 2015.

Looking forward for an early response.

With best regards.

Yours sincerely,

(S.K. NEGI)
